

I was very pleased when XM Radio started to offer Instant Traffic & Weather as part of there broadcast. Our local AM radio station that promotes traffic broadcasts doesn't offer enough detail in their 'Traffic and Weather on the 8's' updates. I can get in my car and listen right away to determine my route. This feature is a big plus and reinforces my decision to pay for my listening service. The same way I choose to pay for cable TV service to allow myself more variety. Don't take away the ability to get maximum benefit from my subscription service.
